GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: RETHAGEN, Juergen
APPLICANT: Bernhagen, Juergen
APPLICANT: Brunner, Herwig
TITLE OF INVENTION: Peptides Used As Agonists And/Or Inhibitors Of Amyloid
TITLE OF INVENTION: Peptides Disease, In Type II Diabetes Mellitus And
TITLE OF INVENTION: In Spongiform Encephalophathies
FILE REFRENCE: US 09/097,194
CURRENT PILING DATE: 1998-06-12
CURRENT FILING DATE: 1998-06-12
MUMBER OF SEQ ID NOS: 21
SOFTWARE: Patentin Ver. 2.1
         PATTERNS TO IDENTIFY NUCLECTIDE, AMINO ACID OR CARBOHYDRATE SEQUENCES IN DATABASES OR TO IDENTIFY ORGANISMS

Patent No. 5824645

GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: JUNCH, TEJINDER
APPLICANT: GOHIL, KISHOR C
APPLICANT: MILJANICH, GERGE P
TITLE OF INVENTION: METHODS OF PRODUCING ANALGESIA AND
TITLE OF INVENTION: METHODS OF PRODUCING ANALGESIA
NUMBER OF SEQUENCES: 34
CORRESPONDENCE ADDRESS:
ADDRESSEE: AMOFÉLICES OF PEET Dehlinger
STREET: 350 Cambridge Avenue, Suite 300
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       th 100.0%; Score 15; DB 1; Length 6; Similarity 100.0%; Pred. Patent No. US20020128175A1
SEMERAL INPORMATION:
APPLICANT: Gattadahalli M. Anantharamaiah
TITLE OF INVENTION: Synthetic Peptides that Enhance LDL Uptake
FILE REFERENCE: D6084
CURRENT PELLING NUMBER: US/09/520,698
CURRENT FILING DATE: 1999-03-17
PRIOR FILING DATE: 1998-03-17
NUMBER OF SEQ ID NOS: 10
SEQ ID NO 4
LENGTH: 18

Patent No. US20020064533A1
GENERAL INFORMATION:
APLICANT: Murray, Kenneth
TITLE OF INVENTION: HBV CORE ANTIGEN PARTICLES WITH MULTIPLE IMMUNOGENIC
TITLE OF INVENTION: COMPONENTS ATTACHED VIA PEPTIDE LIGANDS
FILE REFERENCE: A067 CIP
CURRENT APPLICATION NUMBER: US/09/873,459A
PRIOR PAPLICATION NUMBER: PCT/US99/28755
PRIOR PAPLICATION NUMBER: 60/110,911
PRIOR APPLICATION NUMBER: 60/110,911
             APPLICANT: MILTRAY, Kenneth

pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

US-09-053-702-2

Sequence 2, Application US/09053702

Patent No. 6229069

GENERAL INFORMATION:
APPLICANT: YAMADA, Shigehiro

TILLE OF INVENTION: METHOD FOR CONTROLLING WATER CONTENT OF PLANT

FILE REPRESENCE: 230-122P

CURRENT APPLICATION UMBER: US/09/053,702

CURRENT FILING DATE: 1998-04-02
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ;
